\* Can be used optionally as closest size.

#### Warning & Suggestions:

- Different sizes of the same object (flag, white crescent-star, roundel, square) on the same aircraft can be used. Therefore you should use the decal object fits your reference picture or drawing.
- The sizes of the objects in our decal set are common used ones. The sizes other than in our decal set might be used in real aircrafts.
- This set may not be including the object sizes which you have the reference of them.
- The sizes in our decal set may fit the aircraft models which are not mentioned in the list above. In this case, the sizes of our decals must be compared with the sizes of your reference.
- You may set up non-standard square combinations according to your reference by using different numbers in our decal set due to unstandardized usage of squares in Turkish aviation history.
- Please cut off 1.25mm the length of the flag numbered 10 from the star's side for all applications except 1/48 scale C-47.

There are usages of the flags with white contour like the aircrafts AB-206/OH-58A (coast guard), AB-204ASW, AB-212ASW and F-84G.

- You may first apply white rectangle onto your model according to your scale and reference by cutting it from a white decal paper or from white squares in our decal set. Then, you can apply and center the flag decal on the applied white rectangle.
